*Mining Act 1928-1973*APPLICATION FOR SPECIAL MINING EASEMENT OF
PRIVATE LAND

PURSUANT to the provisions of the *Mining Act 1928-1973* and the Regulations, we, the undersigned, Bougainville Copper Limited of Panguna, Papua New Guinea do hereby apply for authority to construct and maintain a tunnel below the open cut to draw water from the open cut into the Kaweron River. The tunnel will be 3.5 metres high by 2.8 metres wide in section, 6 kilometres in length and is estimated to cost K9.4 million.

Name and addresses of owner, lessee and occupier of the land subject of the application: As per schedule.

SCHEDULE

Proposed to draw water from the open cut for the following reasons:

- (1) Methods currently used by the company for drainage (i.e., mechanically operated pumps) will become grossly inadequate within four years because of heavy water concentration at the bottom of the pit.
- (2) Alternatively an underground tunnel will provide natural drainage under the pit.
- (3) It is desired that the development of the tunnel commence in 1977 to ensure completion in 1981.

In conjunction with the above proposal, plans and specification of the work are shown on drawings No. P200/022, Cat. No. 27/339/M37-S & H-523. P200/022 shows part of surveys of Portions 9 and 11 of the Tailings Lease surveyed by Smith & Hard. It is requested that the easement be granted over all the area of land shaded in blue as per abovementioned drawings

Application for Special Mining Easement of Private Land—
*continued*Schedule—*continued*

subject to final survey of the adit upon completion of the tunnel.

As per abovementioned drawings:

1. (a) Red lines show boundaries of Surveyed Tailings Lease.
- (b) Green line shows boundary of the Special Mining Lease.
2. Plan No. P200/022 Rev. O-Plan and Longitudinal Section of Port Area.
 - (a) Green line—boundary of Special Mining Lease granted 28th July, 1969.
 - (b) Red lines—Boundaries of Surveyed Tailings Lease. The original grant of the Tailings Lease was made on 8th April, 1971 subject, however, to survey.
 - (c) Brown lines—alternatives of Proposed Adit Alignment (i.e., surface plan of underground tunnel). As the final adit alignment will depend on experience of rock conditions at the portal, it is requested that the easement be granted over all that area of land shaded blue subject to final survey of the adit upon completion of the tunnel.
 - (d) The plan shows on the right-hand side relative positions of the depth of tunnel to the natural surface at the intersections with the Special Mining Lease and Tailings Lease before the proposed tunnel's exit (portal) within the Tailings Lease. You will see in this plan that at the intersection with the Special Mining Lease the proposed tunnel will be at least 100 metres underground while at the intersection with the Tailings Lease as surveyed (Ref. Cat. No. 27/339/M37-S & H-523) the tunnel will be 50 metres below the surface. The operation will be undertaken without recourse to man-holes or surface-to-tunnel exits.

OWNER, LESSEE AND OCCUPIER OF THE LAND

From the intake of the proposed tunnel at the open cut to the intersection with the Special Mining Lease and the proposed tunnel, the owners of the land are known to be Bisikan Clan represented by Brother Michael Pariu, Michael Aike and James Aitamarru Kuirua all of Panguna.

From the 6 kilometre point from intake to discharge point, there are no properties of commercial importance except a few village food gardens and thus it is not necessary to divert the proposed direction of the tunnel subject to mutual arrangements between the company and the Bisikan Clan Leaders.

Dated at Panguna this 10th day of August, 1976.
