PART 1

General Instructions, Analysis

and

Explanatory Notes

EXPLANATORY NOTES 1997/98 BUDGETFORMAT

The format of the 1997/98 appropriation ordinance is the same as the 1996/97 ordinance

CODING

The same coding method used in the 1996/97 budget is used in 1997/98 budget which reflects the coding system used by the national Government.

AIMS AND OBJECTIVES

The aims and objectives of this years Appropriation Ordinance is to put more pressure than previously to bring together and consolidate Government's plans which were not achieved in the past years.

It is envisaged to strengthen the function of all divisions so that services can be provided more effectively and efficiently with minimal costs and at the time proper records are kept and accounted for.

With the completion of the new Executive/Assembly office, the office of the Speaker should be established on a full time basis.

As usual, the increase in costs of goods and the delivery of services due to inflation contributes to the general increase in the recurrent estimate.

Other contributing factors to the general increase in this year's recurrent estimate are as follows;

- a) The costs of establishing the Provincial Demonstration Farm at Choiseul Bay mainland area to be managed by the Agriculture staff. Given time, the farm should generate income through sale of its produce.
- b) Junior Day Secondary School subventions.
- c) Primary School development grants.
- d) Saemunga hospital grant.

CAPITAL EXPENDITURE

Most capital items shown in our previous estimates are again budgeted for in our 1997/98 Appropriation Ordinance with the aim of achieving the implementation of at least one or two projects should financial situation permit.

It has been apparent in the past years that projects budgeted for and endorsed have never been implemented due to lack of funding.

Another factor is that the national government does not avail professional and technical manpower to carry out feasibility studies to submit reports to funding agencies.

As such there arises a need for the province to prioritize projects in the approved budget and pursue implementation one at a time to ensure one is completed before embarking on another instead of pursuing more than one at a time and resulting in half finished jobs.

The Works division needs to be strengthened and properly organised to plan out and implement activities to achieve satisfactory results in the province's capital projects.

This Government, in its overall assessment concludes that the budget submitted herewith is realistic and will serve the people of this province with its scope.

1. RECURRENT ESTIMATE
A) EXPENDITURE

The 1997/98 recurrent estimates are hereby compared with the 1996/97 estimates.

The total estimate for 1996/97 totalled \$2,836,550 as compared to \$3,396,000 for the 1997/98 financial year.

This is an increase of \$559,450 or 19.72%.

When analysing the overall increase by division over the 1996/97 estimate, the following results are obtained.

<u>Head</u>	<u>Increase/Decrease</u>	<u>% Increase/Decrease</u>
Works & Transport	161,500	39.53%
Education	139,500	30.45%
Administration/ Finance & Planning	123,050	0.75%
Local Government	64,500	119.00%
Laura Affairs	44,000	34.31%
Assembly	21,000	30.88%
Fisheries	5,900	8.18%

The 1997/98 budget shows a slight increase over the 1996/97 budget. This is due to the increase in cost of delivering services because of inflation, the provincial demonstration farm, Junior Secondary School Subventions and Sasamunga Hospital Subvention.

Payroll has always form a substantial part of the recurrent budget. However, the 1997/98 payroll remains the same as the 1996/97 budget of \$720,000. This is because the restructuring of salaries was already catered for in the 1996/97 estimate. It is therefore estimated that this amount is too big and cannot be exhausted up to the end of the 1997/98 financial year.

(b) REVENUE

The recurrent revenue estimate for 1997/98 is \$2,485,560 an increase of \$288,260 or 12.97%.

There is also a slight increase on local revenue from \$555,746 for the 1996/97 budget to \$780,920 in the 1997/98 estimate, an increase of \$225,174 or 40.52%.

Local revenue accounts for 31.42% of the total revenue for 1997/98. Grants from the national government are specially allocated to the division which they are related to.

2. DEVELOPMENT ESTIMATE

a) The 1997/98 estimate is \$1,895,000 an increase of \$435,000 or 29.79%.

b) All revenue to cater for the 1997/98 development estimate are to be negotiated from the national government and drawings from the province's internal special funds.
